

## 2.3.3\_Mentor Mentee Ratio Reports

## List of Student Mentors for the Session 2020-21

The mentoring system of Hislop College is a well established system which is in place for the last 12 years. The system is unique due to the active involvement of the senior students as peer mentors. This makes the system not only highly effective but also ensures its reach to the individual mentees at an interpersonal level.

Though the college for the session 2020-21 was completely online, 38 fulltime teachers were designated as teacher mentors along with 69 student mentors who joined the force. The remaining 59 full time teachers work in tandem with this team in the process of mentoring.

This group of 107 mentors interacted with the students on a regular basis to address scholastic, personal and other related issues.

# Student Mentoring Cell, Hislop College, Nagpur

## GROUP PHOTO

## REVIEW MEETING

## Report of Student Mentors' Review Meeting held on 25<sup>th</sup> May, 2021

Hislop College Student Mentoring Cell conducted a virtual review meeting of its student mentors on Microsoft Teams on Tuesday, 25<sup>th</sup> May, 2021 at 3.00 p.m. Around 51 student mentors and 04 Core committee faculty members of SMC attended this meeting.

At the onset, convener of mentoring cell, Dr. Jyoti Shiwalkar welcomed the teachers and the students. She mentioned that this year has been exceptional and challenging for all and moreover it was student mentors' first experience of providing online guidance. The student mentors could not meet their juniors personally and had to rely on the digital platforms for mentoring. She further informed the students that this cell is a special initiative of Hislop College started almost 12 years back and has led to conflict free, disciplined and healthy environment on the campus over the years.

She specially congratulated the student mentor Achal Sonekar of B.A. II Sociology for having done remarkable work under the "Learn from Peer" scheme, an initiative of the student mentoring cell. She appreciated the work of all student mentors and said that almost all student mentors have submitted their filled-in mentoring formats to her by emails. Her speech was then followed by the review session of student mentoring, in which some student mentors from different streams shared their experience of online mentoring in the meeting. The student mentors were eager to share their experience.

Namisha Singh a student of B.A.II, History, (Hindi medium) said that although online mentoring was a difficult task she thoroughly enjoyed the experience and was glad to be given this opportunity.

Shanaya James a student of B.Sc. II, CBZ group described mentoring as a fresh and new experience. She told that she guided the juniors with respect to admission process, Time table and cleared all their confusions. She also provided the students with PDF of her old books as the book stores were closed and the students did not have access to notes.

Two student mentors of B. Sc. II Biotechnology, namely Chaitanya Gadekar and Shrushti Chipde shared their experience as different from normal. They tried experimenting with different ideas like conducting workshops, Science through

Theatre etc. Rounak Pahuja, mentor of Statistics group described the juniors as a cooperative group and said that he loved being a mentor.

Akshar Panchakshari, another mentor from Statistics thanked the convener for giving him an opportunity to be a mentor. He commented that clearing doubts of the juniors also cleared his own doubts and gave him a better understanding of concepts. He mentioned sharing of resources, holding meets to explain technical issues related with University online examinations and other issues to be a part of his mentoring experience.

Kanak Agrawal from Commerce stream commented that mentoring was a wonderful experience, she tried to connect with her juniors, provided notes, explained the procedures for filling exam form among others.

Thereafter many student mentors raised their hands and shared their experiences namely Simrat Kour and Mriyam from B.Com, Dhanisha from Sanskrit, Akshat Rao from BBA, Ashley Mathew from BCCA and Nikita Choudhary from MCM. The student mentors in common described this virtual mentoring journey of 2020-2021 as memorable, providing them with a wider view of leadership and a valued personal experience.

Convener Dr. Shiwalkar then declared the session as open forum inviting the students to come forth with their positive as well as negative comments. Prajwal from Electronics and Anchal Bhatia from Psychology again shared their experiences.

The convener concluded the meeting, wishing the students all the best for their future. She asked the student mentors to fill a feedback form which was sent on their group later that evening and invited suggestions from the students for bringing improvement in the quality of the Institute.

At the end, the link for the issue of certificates to mentors was posted in the chat box for student mentors, which was followed by a virtual group photo of student mentors.

### **Feedback Analysis**

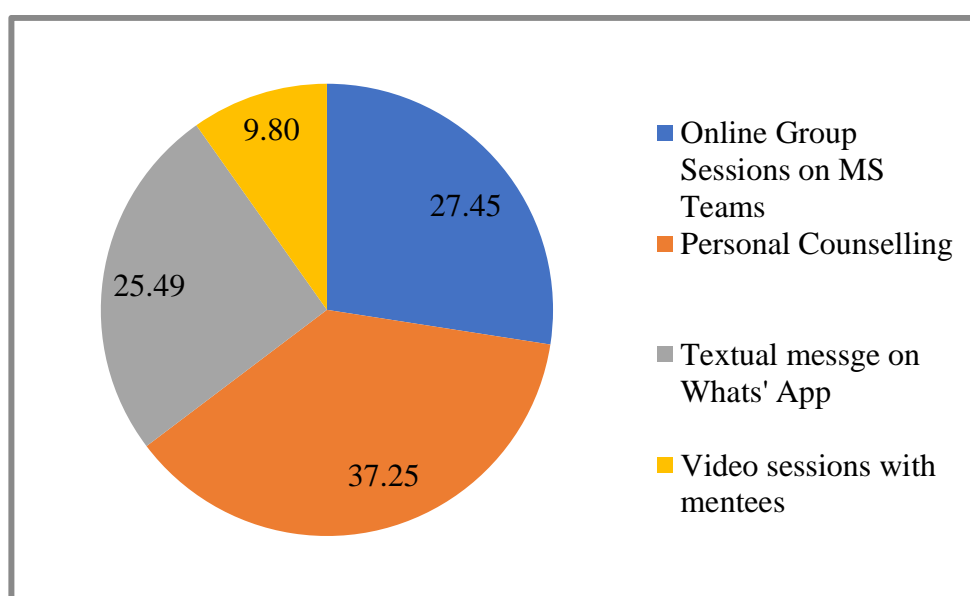

In the feedback responses it was observed that almost all the student mentors have enjoyed their online mentoring activity.

According to all student mentors 4 types of mentoring sessions were mostly conducted by them for online mentoring activity. The favoured mediums of mentoring session are-

- 1) Online Group Sessions on MS Teams
- 2) Personal Counseling
- 3) Textual messages on Whats app
- 4) Conducting video sessions with a group of mentees

The following diagram represents percentage wise classification of Student mentors using each of these methods:

All student mentors opined that their mentees were enthusiastic, curious and sincere enough to know from them as well as cooperative.

The following were the responses of student mentors on their experience of mentoring:

<b>Question: What do you gain from this online student mentoring activity? Explain in your own words.</b>
Social bonding, motivation
Mentoring process is one of the best ways to learn and develop and I enjoy helping my juniors.
Mentoring is a job of responsibility, but at the same time it's also fun. It was a great experience to pass on knowledge and accounts of college life you've already had. However online mentoring is not a sustainable choice for a long term goal, nothing can match the vibrations you get during offline teaching or mentoring for that matter.
It is said that sharing the knowledge increases our own knowledge. Clearing other's doubt (in this sense) makes us explore the topic more effectively than previous. Same happened.
I discovered new ways to help others.

Many things
Leadership Quality
I gained a lot of new experience and make new friends. It also enhances leadership quality and confidence.
Mentoring sessions allow us a two way learning process where both mentors and mentees get benefitted. It's a convenient and effective way to clear out any questions , academic or other.
This is very much helpful. We have a gained a teaching experience. Also we revise our previous semesters through this.
How to talk with our juniors
I am glad to been a mentor and mai aapne Juniors ke help kr paye ye mere liye owner ke baat hi
Helping and working in group builds our own knowledge and confidence.
A whole lot of fruits I had from this amazingly beautiful experience. It helped me understand and feel others, become a beacon of light or support for others.
Through this online mentoring activities I have gained lots of thing by such activities it kept me busy for clearing the doubt of mentees
I give a knowledge  how to work a teacher and their efforts to know that their student.....
There's always something to learn from others
I feel like a leader, or it will be more helpful for my future.
We gained lots of knowledge about how important communication can be and how we can all succeed by helping each other in the necessary regions
.
In my experience, I am very happy to teaching them and I got an experience of how to teach someone.
It help me in improving my communication skills and leadership skill and also get the experience of managing and guiding small group of students.
I gained some leadership quality by helping my juniors. I enjoyed it alot
This cell was a really new and it was interesting experience for me. I really enjoyed communication with my junior and helping them with their doubts. I for sure improved my explaining skills due this cell. And as my juniors kept expressing their gratitude for helping them it felt really great! I
new friends with whom i can share my experiences
I personally learnt that the joy which you receive after helping someone is onto another level.
This is really a new experience for me as mumta ma'am Taught about the computer science programs, flowchart I have taught like that only it is really effective and same time my revision has also been done I have given all the papers n in calls I have solved their problems I have made one group in that students ask me there doubts I have given the Hindi poems summary which I had made in sem 1 notes I have provided them practicals of computer science n made systematic pdf thank you so much mumta ma'am for choosing me  as I am very shy person I speak less n I feel fear to talk with anybody by this I become more confident n I don't feel shy now students are really very co operative and they are very talented.
I have learned that how to communicate with your juniors and how to clear their doubts

<p>It's wonderful experience</p> <p>Being a student u know what are difficulties in online session u face it's same type of difficulties everyone having and u overcome all sorts of problem and your valuable experience u give to all your enthusiastic junior</p> <p>U just talk to Junior solve their problem help them without even knowing their face without even talking to them face to face</p> <p>What I learn from that point to help someone u need not need to be know that very person If it's in your circumference area then u can do /help them</p> <p>U learn a lot from your junior which we forget as we grow up not only in study but in every aspect</p> <p>Thanks u</p>
<p>It's was very enthusiastic for me.. It boosts up my self confidence to interact with the people and encourage me. The mentees were too good at their work they obeyed sincerely and were very cooperative. Thank you so much for selecting me as a mentor 😊</p>
<p>Confidence for making conversations with new people and helping them.</p>
<p>This was my first experience being a mentor and i think i gave my best to the assigned work.</p>
<p>It was a new experience. I learnt how to give the best and help to my mentees with the limited resources available and make the best of each of them.</p>
<p>Development more strong leadership quality. While making mentees understand the concept mine concepts got revised and strong. Overall it was good experience.</p>
<p>It's wow can't explain</p>
<p>Experience gained</p>
<p>I think it was a great opportunity for all the mentors to learn so much through this journey. I believe it was not only helpful for the mentees but also for the mentors because they imbibed some really good qualities such as management skills, teaching skills, empathy, and of course leadership skills. This journey taught us a lot and was truly enlightening.</p>
<p>Leadership qualities, the courage to speak in front of public</p>
<p>I have learn many things think like how to motivate some one and it also enhance my communication skills.</p>
<p>Knowledge, and i use to teach them so, I got some experience of teaching</p>
<p>Leadership skills</p>
<p>The activity helped me boost self confidence, improved my coaching and leadership skills and made me work harder. It was a wonderful experience.</p>
<p>I gained that it's not even that difficult to teach online than it looks like. It just the way is different comparatively to the mentoring you do face to face.</p>
<p>Help to understand better..</p>
<p>One of the benefits of being a mentor is the influx of fresh ideas from your mentee. Your colleague will inject new energy into your classes. Don't feel threatened, as new approaches revitalize what you already do well. A new perspective helps you imagine different possibilities...You develop strong leadership skills, gain new perspectives, and the lessons you teach can also serve as reminders to yourself to follow your own good advice!</p>
<p>Confidence n many more</p>
<p>Different perception of mentees related to the topics. Got challenged every time. Every time they had any queries I was nervous a bit thinking if will be able to answer them correctly or not.</p>

I am very confident for to my mentees
..
It was a new and great experience for me . I feel thankful to teachers for choosing me . I did help the mentees in possible ways besides my family faced Covid and isolation. Thank you.
I m very happy that I got this experience and I m very happy that I have helped and I have got to learn something, I have got some knowledge really thank you for being a mentor.
