

**Save Birds save Humanity**

## Save Birds save Humanity

Save Bird Save Humanity mission was started by the team of NSS volunteers of hislop college where we created small bird feeder/house for birds from waste paper or any other waste items. This mission was started because of two most important reasons that are.

1) As the pandemic situation of covid-19 is rising day by day birds do not get proper food and water 2) The summer season and hot sunny days which is not at all good for birds as well. For making this mission successful and creating awareness in everyone. Our NSS Volunteers Aman Kori & Brijesh Singh Khatana member of NSS group took a huge step ahead by creating a bird house using oil tin containers and they went some places like Burdi, Sadar and Imanvada police station where they hanged this bird house. Created a small bird house at their places and supported this mission The only moto of team nss was that in summers as we human need food and shelters to live a healthy life birds also need the same. So, by this event we decided to spread a message of saving birds. This mission was very well successfully done under the guidance of Mr. Milind Ghate sir & Mr. C.P Farkade sir.
