ADMIN OFFICE : C/o Hislop College, Civil Lines, Nagpur – 440 001

Hislop College Alumni Association Nagpur (HISCAAN) is a registered association vide Registration Number- MAH443/2010 (N) (21/4/2010), under Societies Registration Act, 1860.

‘HOPE’ is a sponsorship programme by Hislop College Alumni Association Nagpur (HISCAAN) for its undergraduate and post graduate students of Science, Commerce and Humanities streams.

‘HOPE’ The College Student Aid Programme was strengthened when HISCAAN launched its student education support programme called ‘HOPE’ in 2013. This project of financial assistance was started on a modest scale. Initially, a few alumni as well as in-house teachers made contributions towards sponsoring 15 students from economically backward class and the scheme has successfully sponsored 1103 students till 2024. This long journey of sponsoring students has become one of the flagship activities of Hislop Alumni

Additionally, the Association has also generously contributed various kinds of items which are required for general usage in the college like the digital notice board and waste paper bins.

Wide range of programmes has been conducted by the Alumni over the years. These include awareness on health issues like Cervical Cancer, Stress management during Examination, Career options in Health Care Industry, Student Interface with experts from the industry and academia to guide students on transition from academics to the corporate world and also to expose them to latest development in the field. Training modules over a period of two days are conducted for the students on Life skills as essentially these abilities help promote well-being and competence in young people as they face the realities of life. Modules range from, personality development, self-expression, communication skills, entrepreneurship, goal setting etc. Internship is a proven way to gain relevant knowledge, skills, and experience while establishing important connections in the field. Practical training along with academic excellence is the hallmark of professionals joining the work force. With this view in mind, HISCAAN took the initiative to get this opportunity for Hislop students, and went about the task of selecting candidates for the appropriate internship. Being a mainstream college catering to basic subjects, it is a progressive thought of providing students with hands-on training in industries, which would prepare them for their future careers.
